

August 2023

Dear Patient

## **Notice Re Managed Repeats**

We are currently taking part in the General Practice Improvement Programme which has been designed by NHS England to help us control workload and provide safe and equitable care. As part of this review, we will be withdrawing the managed repeat service with immediate effect.

## **Why have we made this decision**

For your safety. As this process involves a member of our team manually typing your name and medication onto your clinical record and this has been identified as an area where mistakes can be made.

To release time. This will enable our trained dispensers to concentrate on preparing your medication.

To reduce waste. Often when patients collect their medication they tell us that they do not need everything that has been dispensed.

## **What action do you need to take**

Please order your medication next month using the NHS App. The NHS App is a quick, secure and safe way to order medication. If you are unable to access the NHS App or need help to set this up then please speak to our dispensary or reception team.

We would like to thank you in advance for understanding and support of our hardworking dispensary team.

Yours faithfully

Dr AQ Maggio
